At today's National wool sale held in Napier, prices continued to push to new levels not seen since 2016 ~ The strong wool indicator has now hit the 430cpkg clean mark, that's 90cpkg clean ahead of the same time last year ~ This is encouraging for wool growers starting to shear and levels being high coming into the busy part of the season.

On offer were 10,143 bales with 97% of the catalogues sold at the fall of the hammer.

Competition was very well spread with a full bench of buyers all participating.
